For this study, what I would ask you to do is to register this table accordingly with what's requested at each column, at the end of each day.

Please try to make your replies as succinct as possible, and if you have any questions on how to fill the table please let me know!

This diary study was conducted within my thesis to obtain the Master's degree course in Computer Science and Engineering at Instituto Superior Técnico.

All the data written here will be completed anonymously and will not be used for anything other than academic purposes.

Thank you so much for your cooperation and I promise I'll give you a chocolate of your choice as a reward for your patience and kindness! :)
